

## GREETINGS:

The kinder, gentler energy of March 2021 was ushered in by the Full Moon in Virgo on February 27, allowing a shift into the deep healing waters of magical Pisces as the Sun and Venus offer a three week period of restorative healing of our hearts and minds. After the disruptions and challenges of the past 2 months, following a year of chaos, we are offered a reboot if we choose to allow ourselves to find our softer side and share it with one another. Loving kindness is a feature of the Pisces archetype, as well as creativity and an opportunity to grow spiritually.

Here are some of the major themes and dates of our journey:

## EXPANDED MENTAL CLARITY IN EARLY MARCH:

Now that Mercury has moved forward and is soon to pass the degree of his backward motion (3/13), we receive the gift of Mars entering Gemini, the realm of our mental world, curiosity and communication skills. All of us will find our minds energized and willing to take a look backward so we can see with 20/20 clarity. On March 4 Mercury joins generous, optimistic, expansive Jupiter in freedom loving Aquarius. This is a great time to find new solutions and flash of genius ideas. As mentioned above, Mercury moves past his point of retrogradation on 3/13, just as we experience a New Moon in Pisces, giving us a new start with an open heart. On 3/15 Mercury enters Pisces after 2 months in air sign Aquarius. It is time for all of us to chill out, meditate, slow down and look at our lives with a deeper spiritual understanding. If you don't have a spiritual practice, now is the time to begin or reboot your ideas and actions. In the midst of the Pisces period of March, the Sun joins dreamy, intuitive Neptune (the ruling energy of Pisces) on 3/10. This is a very soft, mystical energy time and a great time to dream, literally and figuratively. At the New Moon in Pisces on 3/13, Venus joins Neptune, the Sun and Moon. This combination bides well for love, lust and abundance. If you are alone at this time, do something wonderful for yourself. It is a rare time of unlimited bliss. We may also become visionary about ourselves, our future and our relationship needs.

## AFTER WATER, FIRE SPRINGS INTO LIFE ON MARCH 20;

After the healing, softer, feeling energy of Pisces gives us a dose of healing energy, the fire returns on the first day of spring, March 20. The fire sign Aries begins the astrological year with a bang. The ruler of Aries is absorbing the energy of Gemini—mental, quick thinking and curious, and it is time to move forward in a major way. On 3/21 Venus moves into Aries to join the Sun and gets a stabilizing boost from Saturn so make sure you have plans make progress before the next retrograde period begins on April 27. The Sun and Venus in Aries urge all of us to go for it. This is a time not to hesitate but to practice boldness and confidence as you reach for more than you can imagine. It is a time to refrain from waiting for others as you move at your own speed. At this time the ruler of Aries, Mars is making a strong aspect with Saturn, and it is one of the more stable times in 2021. There is a jolt of energy on 3/23 as Mars and Mercury combust, making it difficult to be indecisive or aware of your needs and what is true for you. On 3/24 Mercury squares the Lunar Nodes bringing opportunities to resolve past wounds and quickly unite the heart and mind. This is a pattern of expansive growth which can result in a paradigm shift in awareness leading to action.

## FULL MOON IN LIBRA CREATES A TIME OF STABILITY AND FLOW ON 3/28:

With the clarity of a Full Moon in Libra offering us the opportunity to balance our personal needs with those we are in relationship with, this is a time for improved, more honest communication and reconciliation. Intimacy grows as contrast, sometimes leading to conflict, provides clarity in our feeling relationships. On 3/29 the Sun joins Venus in Aries, clarifying more fully what our personal preferences are. This is a time of decision, and it may come in the form of intuition as mental Mercury joins Neptune in Pisces painting a different picture of reality. This is a good time to brainstorm and reality check yourself with a trusted advisor, as the potential to get your wires crossed arrives with the Mercury/Neptune blend. It is a wonderful time for creative pursuits and active, lucid dreaming, however.

The month of March brings two distinct periods of development: the first 3 weeks are about the magic of healing heart and mind; the last 10 days of March are designed for action and progress. If you need clarification of your astrological patterns and/or your feeling brain, I am available for consultations. All of us are expanding our consciousness and that often comes with growing pains.

WISHING YOU PROGRESS, LIGHTNESS, HEALING, JOY, DETERMINATION AND MAGIC,
