

## March 2024 Astrological Outlook

### **GREETINGS:**

In February Mercury, Venus and Mars met with Pluto, allowing us to dig up information from hidden places. In March Uranus, the ruler of Aquarius, the agent of radical, volatile awakening and change, reshapes our consciousness as Venus, Mercury and Mars square off with Uranus on **3/3, 3/4, and 3/9**, sequentially. When Venus and Uranus connected there may have been an awareness for a need for change in their relationships. When Mercury and Uranus connected on **3/4**, insight and fresh perspectives on planning will be available for a shift in our awareness. When Mars and Uranus square off on **3/9** a force fierce enough to push down a wall occurs. When Mercury enters fiery Aries on **3/10** a door of brilliant energy opens and demands courage, determination, and action as we experience the New Moon in Pisces, the last New Moon of the winter season. With Mercury now in Aries until **5/15**, a feeling of passion and excitement leads us to speak up boldly. Mercury connects with the North Node of the Moon on **3/19**, increasing our need to create a path of action that intensifies our courage, boldness and tenacity.

### **MAJOR TRANSIT ASTROLOGICAL PATTERNS IN MARCH 2024:**

Mercury, Venus and Mars take turns in sequence connecting with Uranus on **3/3, 3/4, and 3/9**. Mercury is the planet of thought and communication and when it gets a jolt of Uranus energy, madness and/or genius, enter the equation. Venus is the planet of love, values and attachment, and when Uranus activates her energy, relationships and our definitions of pleasure seeking may expand, and our authentic desires and values may appear. Mars is the planet of action, anger, determination, bravery, and confidence. With Uranus squaring off with Mars, it is a time to slow down, be careful and find a way to be calm. This combination may create restlessness and lead to impulsivity and overreaction, as well as accidents. Irritation and/or rage may occur and hopefully fuel our need to change and to allow us to release what no longer serves us.

### **NEW MOON IN PISCES 3/10/24:**

The New Moon in Pisces is the final New Moon of the winter season and signals the end of the zodiac year which occurs on **3/19**. With the Sun and Moon shining on

Neptune, the ruler of Pisces, there is an opportunity to find peace, calm and creativity if you go within. If you are experiencing fatigue or burn out, it is time to shift into self-care mode, as well as activities that bring you greater peace and acceptance of your life. It is time to develop compassion for yourself. Intuition and synchronicity are part of this equation so look for the green lights from the universe as you move forward.

### **VENUS ENTERS PISCES (3/11-4/4)**

With Venus swimming in the waters of Pisces, after the detachment of her time in air sign Aquarius, waves of love, compassion and beauty arrive to introduce greater tenderness with yourself and others. It is an ideal time for creativity and connection with others. If you need to mend a fence with others, now is the time.

### **MERCURY JOINS THE NORTH NODE OF THE MOON IN ARIES (3/18):**

The North Nodes remain in a sign for 18 months. The North Node moved into Aries in July 2023, bringing courage, confidence, bravery, and determination into our lives. Personally, 2023 was a challenging year that necessitated the development and evolution of these traits. Fortunately, we have until January 2025 to work on developing these traits, as the increase of self-confidence turns us into the people we were meant to be. The traits of the sign the North Node is in always is a remedy for growth as the pathway shows us who we are when we are walking our uniquely individual path.

### **SPRING ARRIVES IN THE NORTHERN HEMISPHERE ON 3/19/20:**

With the arrival of the equinox, Spring brings more light and heat to the northern hemisphere. Day and Night are equal and with the Sun, North Node and Mercury in Aries, more vitality and courage are available as we feel the freshness of change and leap forward. Years ago, I had a client who was trying to become more able to take risks. She was aware that her inner dialogue was holding her back. I asked her what she told herself when she thought about risk. She said, "I'm afraid of what will happen if I risk". I suggested that a better way to think of it is to say to yourself "***I'm afraid not to try***". The year 2024 has energetic astrological patterns that none of us have ever experienced and we will not experience then again in our lives. What have you failed to try that you will regret if you don't try? Time to channel traits of Aries people.

## **FULL MOON IN LIBRA LUNAR ECLIPSE ON MARCH 25, 2024:**

On **3/25** the vortex opens for the eclipse season of 2024. The Moon in this eclipse is in Libra, in the same degree of the South Node of the Moon, where troublesome unresolved issues are waiting for us to change. With the Moon in Libra, it is time to purify old relationship patterns as well as to end people pleasing due to fear of confrontation or a fictional belief that you would hurt them if you chose yourself for a change and said a big “No” some of the time. The message from this eclipse is clear: it is no longer necessary to walk on eggs, sacrifice yourself, your strength and deny your autonomy. It is time to allow your true desires to lead you forward. Eclipses come in pairs and create a space for change as well as awareness. The next Solar Eclipse, the Great American Eclipse occurs on April 8, 2024. It is the last Great American Eclipse for 20 years and has a pathway through Texas for 4 minutes, which is double the time of the last Great American Eclipse. This eclipse occurs with the Sun, Moon, Venus, and Mercury in Aries. With the ruler of Aries, Mars, in watery Pisces, it may be the time for some of us to let off steam.

***I hope you remember that March is the last and only month in 2024 with no retrograde planets (they hold us back).*** This is a month to go for it, make no excuses that cause you to hesitate. It is time for each of us to be brave and live our dreams and develop courage, strategic thinking and speak our own truth to ourselves and others. I hope you will go within and make time to have a conversation with yourself about who you want to become or reclaim. I am making a commitment to myself to use this time for growth, bravery, and success. If I can help you with your path to success, using astrological meaning and timing, as well as my education in psychology, I am available in person or virtually to listen to your concerns and help you go beyond your fear. I remember the title of one of my favorite books of years ago: “Been down so long it looks like up to me”. **This is a year to grow more than you can imagine. THE FORCE IS WITH AND WITHIN YOU!**

It is soon time for children to graduate and go to college and for those who are graduating from college to enter the world of work. I have been privileged to help them with their confidence, self-awareness and clarity about their future with a combination of astrology and psychology. The younger people love astrology and

have apps on their phones and read about astrology like we did in the 1960's. They are truly seeking and often would rather have an experience that increases their emotional intelligence. Let me know if you want to provide this opportunity for those you love.

There are many celebrations in March: Ramadan, Purim, Zoroastrian celebrations, Easter and the Spring Equinox: a major time of change and opportunity. My wish for all of us is to live in the present and live the greatest dreams of our ancestors.

**WISHING YOU CELEBRATION, OPPORTUNITIES, LAUGHTER, KINDNESS, AND COMMUNITY,**

**NAN**
