

GREETINGS:

I hope you are prepared for a dynamic next 30 days. On the late afternoon of June 1, we begin a three phase eclipse cycle which gives us more change energy every 15 days. We have Solar eclipses at New Moons on June 1 and July 1 and a Lunar eclipse at the Full Moon 6/15. This is a great time to make a written plan for rebirth, renewal and reconstructing your life.

SUMMER SOLSTICE; On Tuesday June 21, after two of the three eclipses have occurred, we have the longest day of the year, which is an amazing time to create and share personal rituals with others. If you have not committed to attend the celebration at my house, now is the time to do so. If not, please use the information you have received from me in May to create a ritual on your own.

LANDSCAPING; It is almost past time for planting, pruning and cleaning up your landscape, so if I can help you get it done before it gets hotter and drier, please let me know. If you are tired of watering, I can send my irrigator, and if you haven't had Centerpoint trim your trees, or if you need trees trimmed which are closer to the house, please let me know if you need my master tree trimmer. Additionally, the cold weather, followed by drought and severe heat has had a very profound effect on older trees. If you need a diagnosis and treatment of any tree problems, I can send my Master Arborist.

JUNE ASTROLOGICAL OUTLOOK;

As mentioned above, we begin June with the first of three eclipses in 30 days, two of which (6/1 and 7/1) are solar eclipses, which occur at New Moons. Solar eclipses begin cycles of personal development which usually manifest as events in the outer world. This is an ideal time for planting seeds of desire and intention for a quick harvest. At this time we can begin new plans, travel at a faster pace, make promises to ourselves and watch things grow in our lives. The first eclipse on June 1 occurs in Gemini, which energizes the mind and our communication skills, so it is best to write down your intentions and desires and share them with someone you trust.

On June 15 the Full Moon Lunar Eclipse occurs in Sagittarius which means that much that has been hidden from view comes out into the open. The second Solar Eclipse occurs on July 1 in Cancer, which is the feeling sign of home and hearth, so if you are wanting and needing to make changes to your home and family, this is the time to do so.

On 6/3 Neptune begins its retrograde (resting) period, which creates a period of introverted intuition and creativity and slows down the lives of those with planets in Pisces. On June 4, Jupiter, the largest planet, moves into Taurus for a 12-month stay. After a fast moving time in Aries (since 1/22), where we were all encouraged to develop a stronger sense of self and our own needs and desires, we are going to spend a year being slower, more methodical and practical in our efforts to create wealth and other forms of abundance and security, and to enjoy the sensual pleasures of life, particularly if we have planets in Taurus. Travel and education are particularly beneficial during this phase of life.

On 6/12, Saturn begins its slow movement in Libra once again, and those born in the first three weeks of October will feel the pressure to grow at a more constant speed. June will be a particularly beneficial month for all of us as the planets in Gemini are balanced by the presence of Saturn in Libra, creating better attitude, thinking function and more natural optimism.

With Mercury, the ruling planet of Gemini, entering Gemini on 6/2 for two weeks, we are should experience a bit more light heartedness and feel more like socializing and working out our problems. Those who have been depressed, discouraged and/or overwhelmed by the first 5 months of 2011 will enjoy the change of pace that June begins. Please take some time off and enjoy a more relaxed pace. On 6/3 Mercury and Neptune pull us between the real and the ideal and on 6/7 Saturn and Mercury provide a time of mental balance. On 6/16 Mercury moves into feeling sign Cancer where our needs are more obvious to us, and our desire for self dialysis is more than compelling. Find some time for intentional solitude, especially on 6/18-21, as first Uranus, then Pluto, and finally Saturn, excite, darken, and dampen our moods, respectively.

Venus, our planet of beauty and harmony remains in its own sign Taurus till 6/9, intensifying the effects of Jupiter in Taurus, urging us to create beauty and harmony in all we do. On 6/10 Venus and Neptune challenge our imaginations and take us to new places of creativity. On 6/18, a more satisfied feeling will emerge, especially in our emotional relationships with others, particularly family.

Mars remains in Taurus till 6/20, where it energizes the pursuit of pleasure, creation of greater abundance and prosperity and energizes the action plans of those with planets in Taurus. On 6/20 Mars enters Gemini bringing the desire to talk and laugh to all of us, especially those with planets in Gemini. Spend time with those who are light hearted and absorb their joy.

This is a much better month astrologically, than any we have experienced this year. Take time to enjoy and celebrate it.

If you need to make plans at this time, or resolve old issues, I am available for personal consultations.

ENJOY JOYOUS JUNE;

NAN
