

GREETINGS;

If you are reading this email, you survived the record 3 eclipses in 4 weeks which rocked our world to the core, as well as the Uranus/Pluto square (#3). We all are realigning after such a challenging time. Fortunately the month of June is so amazing, it could be the second act of the amazing June of 2012, when Venus eclipsed the Sun and we began a period of unlimited creative/spiritual potential. As you may remember, Uranus and Pluto formed a 3rd square last month and we saw it in the news over and over: the extreme weather events, explosions, the awful events in Boston, and the amazing rescue of the 3 girls in Ohio. All of these events are reflective of the pattern of these two planets, which last rocked our world in the 1960's when they joined together in Virgo and birthed a new world order compared to the 1950's. We are in the 2nd phase of this process personally and collectively.

The only real fly in the ointment this month is the 3 weeks period when Mercury moves backwards (retrograde) so we have to be cautious about oversharing and overthinking and dealing poorly with uncertainty and change which may feel like torture rather than delight. Mark your calendar, Mercury goes retrograde 6/26 in the sign Cancer, which encourages us to feel our thoughts and to take things personally, for better or worse. Mercury gets going again on 7/20 and reaches the point beyond where it backtracked on 8/3. The planet which represents the Trickster is a mischief maker in the sign of hyper feeling. Remember my advice: you must trick the trickster, as you cannot defeat him.

LANDSCAPING: After an idyllic Spring, Summer is coming on June 21, which means storms and a strong growth cycle. If you have not pruned your trees, now is the last time to do so, as the evenings warm up in July and it is not good for the trees to prune when it is so hot. If you need tree work or attention to tree problems, I have the best people in town available to assist you. If you need irrigation since all plants and people do better with it, I can also send my licensed irrigator to do your job. I know we have been in a drought, but when it rains, it floods and drainage is a major issue for some of us. My house flooded 24 times in 3 years until we finally corrected the problem, so I have the experience and knowledge to help you. I am finally finishing my yard and will send pictures next week so you can have a taste of what is possible. Let me know if I can help you in any way with your exterior decorating needs.

SUMMER SOLSTICE: After so much turbulence this Spring, we are all looking forward to the next season, which is filled with unlimited possibility for transformation and manifestation. I will send instructions next week to plan a ritual. If you are planning to join the celebration at my home on Friday 6/21, the cost is still \$25 and I will send more information next week so you have time to prepare.

JUNE ASTROLOGICAL OUTLOOK;

FINALLY, the beginning of a summer of hope, creativity, joy, self-expression of our deepest, truest self, inspired by our connection to the spirit. I hope you have been cleaning, organizing, releasing and making your life an orderly, beautiful, balanced life experience. If you wondered why, it is because from 6/18-8/16 we are being held by a Grand Trine in the water signs Cancer, Scorpio and Pisces symbolized by the planets Jupiter, Saturn and Neptune, respectively. This is the time to visualize without reservation and manifest more than you can imagine. Water signs represent the feeling function, which is our primary process of connecting, learning and attaching to the world. Very few people have planets in all 3 signs (a Grand Trine), but when they do, we call it a life preserver that keeps you from sinking. I imagine that for those of us who will act from confidence, boldness and a wildly creative spirit, this period will be life changing. Jupiter was last in the sign Cancer from July 2001-July 2002. It urges us to make a nest, spend time with family and friends who feel like family, attending to our need for nurturing and security. Saturn was last in Scorpio 30 years ago. None of us alive were around the last time Neptune was in Pisces. The bases are loaded for the first time in our lives. Please pay attention to your feelings, and most especially each intuitive thought you have. It is a breakthrough to more of the creative spirit if we respond to this opportunity. Saturn in Scorpio is the end of a cycle and the beginning of a deeply transformational time. Since Scorpio is ruled by Pluto, drastic changes are guaranteed. Neptune, the ruling influence of Pisces brings us divinely inspired creativity and a deepening and opening of our spiritual nature. This is the beginning of a Powerhouse time of change.

Neptune goes retrograde on 6/7, which encourages more of the dream time for all of us. Einstein said nothing happens that does not begin in a dream. Also on 6/7 Mars and Neptune square off which inflames the imagination and makes it almost impossible to enjoy the mundane. The New Moon is the following day 6/8 so we are well advised to be prepared to start new projects and begin life anew with enthusiasm. With so many planets in Taurus in May, many people feel stuck. Clean out, organize and release your possessions and uncluttering your life will give you a fresh perspective. The Summer Solstice occurs on 6/21 and the long days of summer will slowly fade, giving way to the Vernal Equinox on 9/22. I didn't realize that the beginning of the new cycle on 12/21/2012 would cause such an uproar in our lives, so I am personally looking forward to the Summer Solstice, as we have now had 2 3-month cycles to make a new neural pathway in our brains, allowing for more resonance and acceptance of this new frequency. The Sun and Earth are at their greatest distance in a six month interval, so I am hoping life will make more sense for all of us thereafter.

My friend Elexis Rice sent me an email stating that when planets change signs it is like changing your hair color. We know the Sun changes signs each month and the Moon every couple of days, but in June Mars, Mercury, Venus and Jupiter are changing signs as well. As expected Mercury, the winged messenger went first on 5/31, leaving Gemini to spend time in Cancer till 8/8, allowing us to embrace our feeling function and make our domestic environment exactly the way we imagine it. Time with friends and family at home will be welcome. Remember Silence is Golden when Mercury goes retrograde on 6/26-7/20. This is not the time to try to resolve emotional issues with anyone, especially family. Keep it to yourself for now, and make sure you don't accidentally send an email to the wrong person. Postpone car buying and expect changes and delays in your appointments and travel plans. Be flexible and keep your sense of humor.

Mars goes next as it moves from Taurus the taskmaster to Gemini the playful, light hearted sign of the forever child. Find some children to play with in June and bring out your inner child if that is your only option. On 6/7, the day that Neptune goes into resting mode, Mars and Neptune square off. It will be tempting to make a big deal out of everything--to your detriment. Chill out and keep your aggression in the deep freeze.

On 6/2 Venus moves into feeling, sentimental sign Cancer bring sweetness and romance for many of us. Being with family or those who feel like family will bring unlimited joy and pleasure. This is a time to renew and create attachments with kindred spirits. This is the time to get your home just like you like it.

On 6/25 Jupiter moves into Cancer for 12 months. This pattern encourages us to be aware of our attachment needs, our deepest feelings and encourages us to take steps to obtain and maintain greater clarity of our feeling needs. Remember, repression of feeling needs leads to depression and one of the cures for depression is expression. Cancer is ruled by the Moon which governs our feelings as well as our madness and neurosis. Spend some time in silence and observe your behavior and that of others with a slower mind. The final days of Jupiter in Gemini occur from 6/1-24 so if you have planets in Gemini, get a move on it. You will have to wait 12 years to have this much momentum and opportunity.

The Full Moon of June occurs on 6/23 so plan to celebrate with those who mirror you and bring you into resonance with your true self. We have a very unusual pattern called the Kite at this time which involves the planets Jupiter, Saturn and Neptune, as well as the Sun and Moon. This is a very fortunate pattern so make the most of it.

If the aforementioned patterns weren't enough, June has only 4 days in which we are not shaped by one of the 4 Grand Trines that occur. On 6/3 a Grand Trine between Mercury, Saturn and Neptune takes shape. This is a fabulous pattern of manifestation if we can discipline our mind and not lose our imagination and spiritual optimism. On June 7 Venus, Neptune and Saturn form a Grand Trine, which is a great time to build new business plans and/or review and revise relationship issues with creative solutions seeming to come from the invisible world of ideas. On 6/18 the Grand Trine between Jupiter, Saturn and Neptune begins, peaking on 7/17 and ending on 8/16. We all have the power to effect

unlimited change during this period. On 6/25 the Sun, Saturn and Neptune form the 4th and final Grand Trine of this amazing month of golden, unlimited opportunity.

Lest this sound like magical thinking, there is always with strong movement forward the regression effect, so know that there are T-Squares to counterbalance these spheres of opportunity. I have always imaged a T-Square as a 3 legged table, which needs the strength of the missing 4th sign to be level. The first T-Square occurs when Mercury and Venus occupy the space between Uranus in Aries and Pluto in Capricorn. Talk about being pushed to the emotional limit between 6/8-12. What is needed is the detachment and fairness of the missing leg of the table symbolized by Libra. If challenges occur for you during that period, find a Libra to have a reality check conversation. Always trust your intuition but sometimes brainstorming with another will trigger the clarity in your own thoughts. The Venus/Uranus/Pluto T-Square provides opportunity for growth in relationships, finances and creativity, again in a fair and balanced manner, a two way street.

Summary of Astrological Trends for June: This is an amazing once in a lifetime period of opportunity for growth and transformation, if we visualize what we want from our innermost self. We need to take time to slow down and feel the needs and desires of our true self and get the support we require to bring these ideas and desires into manifestation, using spiritual practices, especially visualization. With the majority of planets in water, feeling needs and attachment and comfort needs prevail. Pushing ourselves toward some outer goal is a recipe for disaster (against the stars is the loose translation of this word). We need to activate our listening ears to hear our heart and soul and use our intuition consistently and unwaveringly with boldness and courage and trust and we will wind up in a new place in our lives we never knew existed or we would have imagined it sooner. The energy slows down after Mercury goes retrograde on 6/26 and Venus enters Leo on 6/27. At this time it is important to slow down and rest, recreate and regenerate, the 3-R's of a successful, confident, prosperous individual.

I will be in the office all of June if you need help, guidance, or someone to talk to. Enjoy riding this wave. I can hardly wait myself.

Nan
