

## GREETINGS:

Welcome to the world of mystery and magic, deep feelings and guaranteed transformation of all you believe as November opens its doors and invites us into an expanded view of life. We have a powerful Super Moon on 11/3, a New Moon in Scorpio on 11/18, and the planet of fate and boundaries reaching the galactic center on 11/19 for the first time in 30 years. We are all ready to release the pain and pressure of 2017 and give birth to a new consciousness with all its possibilities of transformation. November is preceded by the celebration of Halloween Eve and the first day of November is the annual Day of the Dead. After the Sun enters joyful Sagittarius on 11/21, we will have an opportunity to be grateful as Thanksgiving occurs following the challenges of this Year of the Fire Rooster. With Jupiter joining the planets in Scorpio, all bets are off for keeping things a secret, particularly with regards to sex and money. The fierce force of Scorpio is with us whether we are ready for it or not.

LANDSCAPING: November brings an opportunity to get your landscape needs current after the hurricane, with lower temperatures and adequate rainfall, it is time to enjoy a second spring. I am enclosing two pictures of yards I have recently installed. Please let me know if I can help you, your friends and/or your neighbors in getting your landscape ready for your enjoyment of the holiday season. I have experienced subcontractors and much enthusiasm for creating and maintaining the beauty of nature.

## NOVEMBER ASTROLOGICAL TRENDS:

### FULL MOON IN TAURUS (11/3/4):

This Super Moon, which is the last in fixed signs this year, gives us a dose of the practical in an expanded form, as Jupiter and the Sun in Scorpio dance in tandem with the Moon in Taurus, which is balanced by Pluto in Capricorn. This is definitely a time for creative problem solving and building a vision of the future you want to create. It is also time to fully release the pain of disappointment in the past and the loss of illusions we once held. This Full Moon coincides with Samhain, the midpoint between the Fall Equinox and the Winter Solstice, reminding us to live fully and in alignment with our deepest values. This Full Moon brings to light where we may be holding on too tight to what we have, thereby blocking vitality and abundance. With Jupiter in Scorpio for the next year and joining the Sun at the Full Moon, letting go of what is not working is key to welcoming opportunities for expansion. This the only Full Moon in the Fire Bird year where the Sun and Jupiter join, asking us to seek and seize opportunities for growth and success. This is a time of "lucky timing", expanded optimism, and puts us at the right place at the right time. This is a period of increased sensitivity so slow down and listen to your inner voice.

### FINAL BALANCING PERIOD OF SATURN AND URANUS (11/11):

This is the third act of a 12-month period of making progress slowly. Evaluate where you were one year ago and claim the lessons and the progress that are part of your life today. With Saturn in Sagittarius and

Uranus in Aries, both fire signs, it is tempting to minimize your progress, but take time to be grateful for the lessons which have awakened you to a stronger, more resilient version of your true self. You may have surprised yourself.

#### VENUS AND JUPITER JOIN IN SCORPIO (11/13)

This is the only time in 2017 that these two fortunate energies join together in Scorpio. Often, big gains occur for those who are open and prepared. Relationships may improve as secrets disappear and are replaced by true, deeper intimacy, particularly in matters of sex and finances. Plan something wonderful during this time. This period is followed on 11/16 with Venus and Neptune balancing our creativity and feeling values in wonderful ways. For those who honor their feeling function, this period (11/13-16) will be a powerful time of abundance and openness to more than we have imagined, as there are no limits with this pattern and some of us will be riding waves of joy.

#### NEW MOON IN SCORPIO (11/18)

This is a time for new growth in our life, which may require us to eliminate what is not working for our highest and best self. Old projects, relationships and projects which no longer provide a return can be safely left behind. The Scorpio period reminds us of our own mortality and the loss of others we have loved, inspiring us to live with greater vitality, passion and intention. Scorpio symbolizes walking into the pain of life to create renewal on the path of transformation. It is the alchemical path of release of the old so new can appear, sometimes magically. We can direct and apply this power of the New Moon's power of regeneration to any area where we feel stuck or stagnant. Like the lotus, pictured below, we can bloom in the mud. It is necessary to enter the emotional world where we may have frozen due to fear and trauma, no longer allowing our emotions to flow. Remember "feeling leads to healing", so when we turn toward the pain our heart opens and brings a larger space into our life for what truly heals our wounds. This New Moon is joined by Neptune in Pisces and the Sun/Moon/Jupiter and Venus in Pisces, a water life preserver of deep feeling healing to take us to the current of our better life. Since Mars and Pluto form a strong pattern of power/powerlessness on 11/19, we need to pay attention to which side of this equation needs our attention. As the planet of fate Saturn moves toward the Galactic Center thereafter, there is support for patterns and beliefs which keep us stuck in patterns of reactivity being replaced by what supports our evolution and growth.

#### SUN ENTERS SAGITTARIUS (11/21); NEPTUNE MOVES FORWARD (11/22) SATURN AT GALACTIC CENTER

The Sun enters optimistic, unlimited Sagittarius on the evening of 11/21, reminding us that our beliefs can shape identity and reality and optimism is the best strategy for an unlimited life of joy and abundance. Neptune turns its tide in its home of Pisces on 11/22 returning visionary energy and unlimited creativity into our lives. The Galactic Center of our universe was discovered in February 1974 and is occupied by Saturn every 30 years, marking measurable changes in our lives. This last occurred in 1988-89. Review your history to see how you grew as a result of the changes that occurred at that time. We have been in a similar cycle for the past year, and the period of change we have been experiencing as brought a renewal of fear that we are needing to acknowledge and release to make way for a better life. As November comes to an end, we are moving forward into a new version of ourselves on a wider path. Take some time to evaluate your progress and make adjustments where necessary.

#### MENTAL ENERGIES ARE STRONG THE LAST WEEK OF NOVEMBER

On 11/25 Mercury in Sagittarius is energized by the energy of fellow fire sign Aries, as Uranus makes a triangle pose of brilliance and balance. Wit and wisdom join together with prophetic tendencies and come up with solutions and new ideas. Don't miss this opportunity to create and problem solve, especially with those you resonate with. On 11/28 Mercury and Saturn come together for the last time in Sagittarius and the still, deep brilliance of this combination is unbeatable for seeing what details you have missed. This is the time to speak with authority where necessary.

November is a very mysterious month in my life. I have no planets in Scorpio so it is a permanent surprise to me. In November of 1971 I became a professional astrologer after I was fired from the job I had enjoyed for many years. I have never looked back and enjoyed the wild ride that began 46 years ago. I look forward to many more surprises that are beyond my understanding and imagination. This is a time to become a Leaping Beauty and LIVE THE MAGIC. If I can help you in any way, I am honored to share my knowledge with you as you exceed your limits.

GO ASTROS – EARN HISTORY!!
